Updated Live Events!

HPLC is one of the most powerful analytical tools. The topics in this LC e-seminar series are aimed at helping you get the most out of your HPLC. Whether you're a novice chromatographer or have been doing it for years, here's your opportunity to learn more. We will cover topics ranging from the basic fundamentals and column design to how you can translate your existing methods to sub-2 μ m columns for faster separations. Ways to develop a robust method that stands the test of time will be discussed as well as how to troubleshoot when things go wrong. We will look at evolving technologies; how to best take advantage of them and how to integrate them into your current lab workflow. Check out this comprehensive free HPLC eSeminar series and **sign up today!**
